PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate seeking an entry-level Software Engineer / Java Developer role. Proficient in Core Java, Spring Boot, RESTful API design, and MySQL, with hands-on experience in the full software development life cycle — from requirements analysis and system design through coding, testing, and deployment. Committed to delivering error-free, well-documented software and continuous skill upgradation through certifications and emerging-technology workshops.

TECHNICAL SKILLS

Languages: Java, Python

Frameworks & Technologies: Spring Boot, REST API, JWT Authentication, Kafka

Databases: MySQL

APIs & Integrations: Groq API, Custom API Integration

Tools & Platforms: GitHub, Figma, Canva

Practices: SDLC, OOP, Data Structures & Algorithms, Code Documentation, Root Cause Analysis

PROFESSIONAL EXPERIENCE

Java Backend Developer (Trainee)

TechMasters Trainings Pvt Ltd

Bidar, Karnataka

2025 – 2026

- Studied information needs, system flows, data usage, and work processes to understand product requirements and translate them into feasible technical designs.
- Developed a comprehensive backend for a Blood Bank Management System using Java Spring Boot, implementing RESTful APIs for donor registration, blood inventory management, and request processing.
- Designed MySQL database schema and efficient data models for blood stock tracking, donor information, and hospital request management, ensuring optimal system performance.
- Integrated JWT-based authentication and authorization to ensure secure access to sensitive medical data, improving system reliability and compliance.
- Performed code reviews and testing to ensure error-free, bug-free releases; prepared documentation covering programming project specifications, activities, and status reports.
- Coordinated with team members on daily project status and progress, ensuring on-time delivery and adherence to release plans.
- Designed intuitive UI mockups using Figma for a student-facing engineering project platform, focusing on user experience and conversion optimization.
- GitHub: github.com/mrpatil1260/bloodbankmanagementsystem

EDUCATION

Guru Nanak Dev Engineering College (GNDEC)

Bachelor of Engineering – Electronics and Communication Engineering

Bidar

Dec 2022 – May 2026

- CGPA: 7.91 / 10

CERTIFICATIONS & TRAINING

J.P. Morgan – Software Engineering Virtual Experience

Forage

- Completed virtual experience focused on project setup, Kafka message streaming, H2 in-memory database, and REST API integration — directly applicable to enterprise-grade software development.

IEEE International Symposium – Cloud, Quantum Computing & AI

GNDEC Bidar

- Gained insights into emerging technologies including cloud infrastructure, quantum computing, and practical AI applications, supporting continuous learning objectives.

Workshop on AI and Generative AI

GNDEC Bidar

- Completed hands-on workshop covering AI fundamentals, real-world applications, and Gen-AI tooling, broadening understanding of cutting-edge software capabilities.

INTERPERSONAL SKILLS

Communication: Clear written and verbal communication with team members and stakeholders; adept at preparing formal reports and status updates.

Team Collaboration: Experience coordinating with cross-functional teams across daily scrums and project reviews.

Problem Solving: Skilled at root cause analysis of system issues and identifying improvements to performance and availability.

Adaptability: Quick to learn new programming languages, frameworks, and tools through self-study and structured training.

Time Management: Consistently deliver work on schedule with attention to release plan adherence and milestone tracking.
